MAIL- IN PETITION

Given the current economic conditions here in Georgia I am gravely concerned that our state government is becoming less responsive to the people's needs, and less compliant with the Constitutions of the US and Georgia.

I submit this petition to my state representative and senator representing me.

I want you

Representative:_____ district #_____

Senator:_____ district #_____

...to initiate and/or support legislation for the following causes in the 2012 legislative session:

Instructions: Find your Georgia State representative and senator at www.congress.org and write in above. Circle the numbers of the below items that you like and cross out items you don't like, and then put your initials next to the number.
